

Summary of Product Applications

Rockett Brand™ 100 Unleaded Racing Gasoline: Legal for the street in all 50 states. Good for street applications in high performance cars, trucks, and bikes including mild turbo/supercharged engines. Racing applications include use in engines with 14:1 compression ratio or less. Includes racecars, bikes, watercraft, boats, sports cars, etc. This gasoline was used in the 24 Hours of Daytona through 2003.

Rockett Brand™ 111 Leaded Racing Gasoline: For use in “Off Highway Sanctioned Events Only”. This gasoline was developed for NASCAR Winston Cup Series, NASCAR Busch Grand National Series, NASCAR Craftsman Truck Series and most Saturday night racing events. It has been used in most other NASCAR series as well as NHRA & IHRA drag racing. It has been used in 358 cubic inch engines with 16:1 compression ratio.

Rockett Brand™ 114 Leaded Racing Gasoline: For use in “Off Highway Sanctioned Events Only”. This gasoline is used in boats (big bore normally aspirated, supercharged or turbocharged applications) and drag racing applications. It was designed for use in big block racing engines with up to 16:1 compression ratios.

Rockett Brand™ 118 Leaded Racing Gasoline: For use in “Off Highway Sanctioned Events Only”. This gasoline was initially designed for 500 cubic inch, 1200 + horsepower NHRA Pro Stock Racing Engines. It has since found it’s way into big block boat engines, and many other drag racing applications. This fuel has been proven as an excellent product for nitrous oxide equipped engines, high boost supercharged/turbocharged engines, and for any high RPM application where a “fast burn” is desired.
